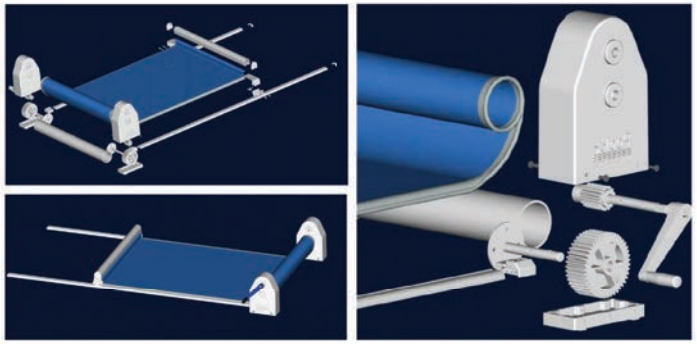
V5 MANUAL

The Stepping stone to Automation

Perfect for one person to operate.The cover is opened using a crank and closed by pulling a rope. Our V5 manual cover can be upgraded to an automated cover at any given time.

WWW.DESIGNERCOVERS.CO.ZA

The PoolLock V5 Manual Easy Glide Safety Cover is an improvement from any other manual system available on the market because the mechanism has a built-in gear (ratio 4:1). The cover is opened by using a crank handle which acts like a key and it is removable – making it child and pet safe! Closing the cover is done by pulling a harness.



This is the stepping stone to automation as this can be upgraded at any given time as all we do is remove the mechanism and install the Hydraulic mechanism and powerpack.

A V5 Manual can be installed with various options (top track – top mechanism etc.)

CUSTOMIZED

You have the option of installing the mechanism above ground (on existing pools) or below ground with new builds or with a small renovation. Our covers can accommodate most shapes, designs, and pool sizes with various colours to choose from.

Instalaltion Options:

TOP Track - TOP Mechanism
TOP Track - UNDER Mechanism
UNDER Track - UNDER Mechanism
Free Form Pools

Top Tips:

- Chlorine levels need to be checked and be stable at all times to increase the lifespan of this product.
- Always remove your cover when treating your pool.
- A well-balanced pool saves time and money.
- Most importantly – when it's covered, you're saving!
